

Document every sensor, gateway, and environmental endpoint.

IoT / Sensors & Metering As-Built Documentation

Owner-side, field-verified records for leak detection, occupancy, IAQ, metering, lighting controls, environmental sensors, gateways, alert paths, and platform context.

WHY IT MATTERS

FIND HIDDEN DEVICES

Surface sensors and gateways that sit outside normal security, IT, and facilities records.

VERIFY ALERT PATHS

Show what devices monitor, where alerts appear to route, and who appears to support them.

PREVENT STALE RECORDS

Keep metering, leak detection, IAQ, and OT endpoint information usable after changes.

OWNER-READY DELIVERABLES

PDF REPORT

Field-verified documentation with photos, notes, findings, and system context.

SENSOR INVENTORY

Leak, occupancy, IAQ, environmental, metering, and lighting-control endpoints.

FLOORPLAN OVERLAYS

Device and gateway locations shown on clean owner-ready plans.

GATEWAY / PLATFORM MAP

Gateway, BAS/OT, cloud platform, network, and alert-routing context where visible.

EXCEPTIONS LOG

Offline, abandoned, inaccessible, unlabeled, unsupported, or unknown-owner devices.

EXECUTIVE SUMMARY

High-level overview of sensor coverage, support gaps, risks, and recommended actions.

BEST FOR

LEAK DETECTION AUDITS

Know what protects the asset and who receives actionable alerts.

ENERGY METERING REVIEWS

Document meters, gateways, panels, and visible communication pathways.

OCCUPANCY / IAQ

Clarify locations, platforms, ownership, and operational status.

ANNUAL REFRESH

Keep fast-changing environmental and sensor records current.
