

GLOBIN
ENGINEERING
BUILDING TECHNOLOGY. DOCUMENTED.

Turn the owner record into a working dashboard.

Interactive Building Systems Inventory Dashboard

A custom browser-based dashboard that helps owners and operators view, filter, update, export, and report on the field-verified building technology record.

WHY IT MATTERS

WORK WITH THE RECORD

Move from static closeout files to a usable view of devices, systems, closets, and exceptions.

FIND ANSWERS FASTER

Filter by building, floor, system, status, vendor, verification level, and keyword.

TRACK OPEN ITEMS

Keep exceptions, lifecycle flags, and documentation uncertainty visible in one owner-side view.

DASHBOARD DELIVERABLES

DASHBOARD APP

Self-hosted browser-based owner/operator view of the verified record.

DEVICE INVENTORY

Tables for system, floor, room, manufacturer, model, status, vendor, and notes.

FLOORPLAN VIEWS

Floorplan overlays and marker views for devices, systems, exceptions, and updates.

EXCEPTIONS TRACKER

Missing, inactive, inaccessible, abandoned, conflicting, or undocumented conditions.

CSV / EXCEL EXPORTS

Export device records and review-ready tables for owner teams.

BRANDED REPORTS

Generate report-ready outputs for executive review, planning, and refresh cycles.

BEST FOR

FULL BUILDING PACKAGES

Add an interactive working layer to the PDF and floorplan record.

ANNUAL REFRESH

Update the same owner-side dataset as systems change.

PORTFOLIO RECORDS

Compare systems, vendors, and exceptions across assets.

OWNER OPERATIONS

Give PM, facilities, IT/OT, and security a shared record view.
