

Start scopes from field conditions, not inherited guesses.

Field-verified owner records for Integrators & PM Firms

Neutral documentation that gives integrators, project managers, and implementation teams a cleaner baseline before bids, upgrades, takeovers, closeout correction, and execution.

WHY IT MATTERS

REDUCE PRICING RISK

Bid from verified device counts, locations, rooms, and support context.

SURFACE UNKNOWN CONDITIONS

Expose missing records, unlabeled gear, access gaps, and contradictions early.

IMPROVE HANDOFFS

Give owners, vendors, PMs, and field teams the same starting point.

SCOPE-READY DELIVERABLES

PRE-BID FIELD BASELINE

Verified existing conditions before pricing, phasing, or execution.

DEVICE SCHEDULES

Device, system, room, closet, and support-context schedules for scoping.

FLOORPLAN OVERLAYS

Existing conditions and device locations shown on clean owner plans.

SCOPE EXCEPTIONS LOG

Unknowns, field constraints, access gaps, and assumptions separated clearly.

VENDOR / PLATFORM MATRIX

Platforms, vendors, responsibility boundaries, and support assumptions.

OWNER-READY PDF REPORT

A professional package the owner can keep, forward, and refresh.

BEST FOR

PRE-BID SCOPING

Reduce uncertainty before pricing a complex building.

UPGRADE PLANNING

Start modernization from actual field conditions.

TAKEOVER SUPPORT

Clarify inherited systems before support changes hands.

CLOSEOUT CORRECTION

Turn incomplete closeout into an owner-ready record.
