

Turn old closets, mystery devices, and stale records into clarity.

Undocumented System Cleanup As-Built Baseline

Owner-side, field-verified records for unlabeled equipment, abandoned devices, inherited platforms, unknown paths, messy closets, and outdated documentation that no one trusts.

WHY IT MATTERS

SURFACE THE UNKNOWN

Separate active, abandoned, unsupported, and unclear technology conditions.

RESTORE CONTROL

Give owners a usable baseline before cleanup, replacement, rebid, or support review.

REDUCE OPERATIONAL RISK

Document gaps and assumptions before they become project delays or emergencies.

CLEANUP-READY DELIVERABLES

FIELD BASELINE PDF

Clear documentation with photos, field notes, confirmed facts, and open questions.

UNKNOWN DEVICE REGISTER

Unlabeled, legacy, abandoned, unsupported, and unclear equipment tracked in one place.

FLOORPLAN REFERENCES

Equipment rooms, closets, panels, devices, and support areas mapped for owners.

VENDOR / PLATFORM MATRIX

Known systems, vendors, ownership assumptions, and support boundaries.

EXCEPTIONS LOG

Missing labels, inaccessible areas, unsupported gear, unknown paths, and stale records.

CLEANUP PRIORITIES

Practical next steps for risk reduction, rebid, refresh, or modernization.

BEST FOR

OLD CLOSETS

Bring order to unlabeled racks, panels, wiring, and devices.

VENDOR TAKEOVERS

Know what the new support team is inheriting.

CAPEX PLANNING

Scope cleanup before modernization budgets are set.

OWNER RECORDS

Replace scattered notes with a usable field baseline.
