

**GLOBIN
ENGINEERING**
BUILDING TECHNOLOGY. DOCUMENTED.

Start with one system and make it owner-ready.

Single-System Baseline Starting at \$5,000

A focused owner-side documentation package for one defined system before pricing, support review, migration, cleanup, or vendor takeover.

WHY IT MATTERS

FOCUSED SCOPE

One defined system such as PACS, CCTV, IT/LAN, AV, BMS/OT, or similar.

PRACTICAL RANGE

Typical starting scope: up to 50,000 SF, 3 floors, and 60 devices or endpoints.

CLEAR OWNER RECORD

Get a credible baseline before bids, renewals, replacement, or support changes.

INCLUDED DELIVERABLES

OWNER-READY PDF REPORT

Concise as-built documentation with photos, field notes, and findings.

SYSTEM INVENTORY

Verified device, endpoint, room, platform, status, and support-context records.

FLOORPLAN OVERLAYS

Device locations and system zones shown on clean owner-ready plans.

DEVICE SCHEDULE

Exportable schedule for bids, support review, and owner operations.

EXCEPTIONS LOG

Unknown paths, unlabeled devices, inaccessible areas, and lifecycle flags.

SCOPE SUMMARY

Clear assumptions, coverage limits, and recommended next-step options.

AVAILABLE ADD-ONS

RISERS / ONE-LINES

Add system diagrams when paths and head-end context are in scope.

DASHBOARD ADD-ON

Make the verified record searchable for owner and operator use.

ANNUAL REFRESH

Keep the baseline current after changes and vendor work.

RACK ELEVATIONS

Document racks, panels, patching, and head-end equipment where needed.
