

REGULATORY REQUIREMENTS

Education records for **FERPA +** campus safety review.

Education Technology Records for FERPA, Campus Safety, and Vendor Review

Field-verified owner-side records for K-12 schools, universities, residence halls, athletics, labs, libraries, visitor systems, access control, video, classroom AV, and distributed IT.

Owner-side record - not a certification.

Factual source material for privacy, safety, legal, IT, facilities, administration, and vendors.

Why it matters

Map video, access, visitor, incident, and emergency communication record context.

Reconcile phased systems across classrooms, halls, labs, athletics, libraries, and admin space.

Show locations, retention assumptions, vendor boundaries, and open exceptions before review.

Technology records to verify

Video / VMS + retention assumptions

Access control + lockdown interfaces

Visitor, intercom + duress points

Classroom AV, Wi-Fi + IT closets

Regulatory-review inputs

- Student privacy and record-handling context
- Camera, visitor, incident, and access inputs
- Campus safety / emergency communication context
- State, district, grant, and policy review support

Owner-ready deliverables

- Campus / building technology inventory
- Camera, reader, intercom, duress, and IT overlays
- Vendor/platform matrix and support boundaries
- Exception log and owner package for review

Best fit

K-12 + independent schools

Universities + campuses

Residence halls + athletics
