

GLOBIN
ENGINEERING
BUILDING TECHNOLOGY. DOCUMENTED.

REGULATORY REQUIREMENTS

Transportation records for airport, port + secured-area review.

Airport, Port & Secured-Area Records for Owner Review

Field-verified owner-side records for airports, terminals, port facilities, logistics terminals, yards, parking, secured areas, and transportation operations spaces.

Owner-side record - not a certification.

Factual source material for compliance, security, IT/OT, legal, engineering, vendors, and operators.

Why it matters

Map SIDA/AOA, sterile, restricted, tenant, and controlled zones.

Verify badging, gates, cameras, intrusion, and monitoring coverage.

Scope sensitive records for internal review, handoff, procurement, or redacted use.

Technology records to verify

Secured-area access
badging + gates

Camera, intrusion +
perimeter monitoring

Intercom, duress +
emergency comms

Network closets +
security backhaul

Regulatory-review inputs

- SIDA/AOA, sterile, restricted, and tenant boundaries
- Access points, gates, escort/challenge context
- Monitoring locations and security-system records
- SSI / role-scope notes for controlled distribution

Owner-ready deliverables

- Secured-area technology inventory
- Access point, camera, and gate overlays
- Riser / closet / network-support context
- Vendor/platform matrix and exception register

Best fit

Airports + terminals

Ports + maritime facilities

Logistics yards + secured ops
