

GLOBIN
ENGINEERING
BUILDING TECHNOLOGY. DOCUMENTED.

REGULATORY REQUIREMENTS

Industrial + manufacturing OT records for cyber- physical risk review.

Industrial & Manufacturing OT Records for Cyber-Physical Risk Review

Field-verified inventory for controllers, gateways, networks, vendors and physical-security systems before cyber, insurance, capital or customer review.

Owner-side record - not a certification.

Field-verified source material for owners, advisors, auditors and vendors.

Why it matters

See actual OT assets
before deciding risk.

Trace IT/OT closets, remote
access and vendors.

Document protection for
high-criticality areas.

Technology records to verify

BMS/BAS/OT
controllers

IT/OT closets
+ remote links

Access, camera
+ perimeter

Legacy/vendor
systems

Regulatory-review inputs

- OT controller and gateway inventory
- Switch, firewall and remote-support context
- Physical security at equipment rooms
- Lifecycle and unsupported-device flags

Owner-ready deliverables

- OT and building technology inventory
- Floor and area overlays
- Vendor/platform + remote support matrix
- Exception + high-criticality register

Best fit

Manufacturing plants

Labs + warehouses

Mixed IT/OT sites
